Maximum video length 60 seconds• Image/Infographic: Client to provide a URL to the landing page where the graphic can be downloaded

The screenshot displays the Zillow website interface. At the top, the Zillow logo is prominent. Below it, a navigation bar includes links for 'Buy', 'Rent', 'Sell', 'Home Loans', 'Agent finder', 'Manage Rentals', 'Advertise', 'Help', and 'Sign In'. A search bar is located on the left, with 'Seattle WA' entered. To the right of the search bar are filters for 'For Sale', '\$400K-\$600K', 'Beds & Baths', 'Home Type', and 'More (1)'. A 'Save search' button is also present. The main content area is divided into two sections: a map on the left and a grid of property listings on the right. The map shows the Seattle area with various neighborhoods labeled. The property listings include images, prices, and details such as the number of bedrooms, bathrooms, and square footage. Some listings also feature a '3D Tour' or 'Designer finishes' badge. The bottom of the page has a footer with the text 'Want to include this placement in your next campaign? Please contact your assigned Zillow sales rep or email brandadvertising@zillow.com.'

Use the [Native Search Ad Preview](#) tool to see your image, logo and copy in the ad placement.

¹Logo must be cropped as much as possible with no padding surrounding it.

²Character counts are estimates, if the text is too long to fit, it will be automatically truncated. Copy must also not include italicized letters or be in all capitals. Some special characters may be used sparingly.

Expandable Content Guide Ad Unit Creative Timeline

Execution	Partner provides: <ul style="list-style-type: none">• Featured image, logo image, header copy, subheader copy, and click through video URL• Impression tracker for expanded unit• 1 click tracker for the click to landing page
Lead Time	Kickoff call: 15 business days prior to the campaign's launch date ³ Assets due: 5 business days prior to launch date

³This expandable rich media unit requires additional discussions between graphic design teams and engineering to determine exact functionality and look.

Tips for saving images:

- Always save images at the highest quality possible (within the specified file size)
- PNG files tend to be higher in size so if you're having trouble keeping the image under the specified file size, try saving it as a jpg at a high resolution
- When saving an image to our spec sizes, do not size and image up and save it, this will cause your image quality to go down
